

Core Feature ID		Function Requirement ID(s)		User Story ID(s)		System Components		Timeline		
Feat 1	Core Feature 1: The system will allow users and restaurant owners/managers to create accounts and log in. It will handle user authentication (login), authorization (what each user is allowed to do), and basic user identity management. Different roles such as regular users and restaurant owners/managers will be supported.	Feat1-FR1	The system shall allow customers, restaurant owners/managers, and couriers to create and maintain personal profile accounts.	Feat1-US1	As a customer, I want to create an account so that I can place an order.	2. User Account Management Module	10. User Interface (Customer)	Feb 19 - Sprint Backlog to Progress	Done	
				Feat1-US2	As a restaurant owner, I want to create an account so that I can sell items.		11. User Interface (Staff)	Feb 19 - Sprint Backlog to Progress	Done	
		Feat1-FR2	The system shall validate input when users create an account.	Feat1-US7	As a courier, I want to create an account so I can receive and deliver orders.			March 4 - Sprint Backlog to Progress	Done	
		Feat1-FR6	The system shall create and maintain a session while a user is logged in	Feat1-US6	As a user I want to be able to change my password to protect my accounts security.		10. User Interface (Customer)	March 4 - Sprint Backlog to Progress	Done	
		Feat1-FR3	The system shall authenticate users using email and password credentials	Feat1-US5	As a user I want to log out of my account to protect its security.	1. Authentication and Authorization Module	12. User Database	March 11 - Sprint Backlog to Progress	Done	
		Feat1-FR4	The system shall authorize access to app content based on user roles	Feat1-US3	As a customer or restaurant owner, I want to log into my account so I can access the app services.	1. Authentication and Authorization Module		March 11 - Sprint Backlog to Progress	Done	
		Feat1-FR5	The system shall allow restaurant owners to assign and revoke restaurant manager and courier privileges	Feat1-US4	As a restaurant owner, I want to be able to add/remove manager access to other managers so they can sell items too.	2. User Account Management Module	10. User Interface (Customer)	March 11 - Sprint Backlog to Progress	Done	
				Feat1-US8	As a restaurant owner, I want to be able to add/remove courier access to users so I can assign them deliveries.	8. Delivery Management Module	11. User Interface (Staff)	Mar - In progress	Done	
Feat 2	Core Feature 2: The system will store information about restaurants and their menus. It will ensure that data is valid, properly connected (for example, menu items must belong to a restaurant), and that basic constraints are enforced, (such as preventing invalid or missing values.	Feat2-FR1	The system shall store information about restaurants.	Feat2-US1	As a restaurant owner, I want to add a menu so I can sell my items to customers	4. Restaurant Management Module	11. User Interface(Staff)	Feb 19 - Sprint Backlog to Progress	Done	
		Feat2-FR2	The system shall store inventory quantities of food items	Feat2-US2	As a restaurant owner, I want to add and delete items from my restaurant listing so it is up to date with my restaurant offerings	3. Food Product and Inventory Module	11. User Interface(Staff)	March 11 - Sprint Backlog to Progress	Done	
		Feat2-FR3	The system shall store information about food items.	Feat2-US3	As a restaurant owner or restaurant manager, I want to track inventory so I can prevent orders with unavailable inventory.		14. Food Item Database	March 11 - In progress to Done	Done	
		Feat2-FR4	The system shall allow restaurant owners to create, update, and delete restaurant listings.	Feat2-US4	As a restaurant owner, I want to set business hours so I only receive orders when my restaurant is open.	4. Restaurant Management Module	11. User Interface(Staff)	March 11 - Product Backlog to Sprint Backlog	Done	
		Feat2-FR5	The system shall validate restaurant and food items to prevent missing or invalid entries.	Feat2-US5	As a restaurant owner I want to be able to mark my restaurant as inactive so I wont receive orders if my restaurant closes or no longer uses the system.		15. Restaurant Database	March 11 - Product Backlog to in Progress	Done	
		Feat2-FR6	The system must prevent customers from ordering food items with insufficient inventory.	Feat2-US6				11. User Interface(Staff)	Not completed because it is not a main requirement for our app	
		Feat2-FR7	The system must allow restaurant owners and managers to define business hours.	Feat2-US7						
Feat 3	Core Feature 3: The system will allow users to browse restaurant menus and search for items or restaurants. Backend logic will handle filtering, searching, and returning paginated results.	Feat3-FR1	The system shall allow users to browse a list of restaurants.	Feat3-US1	As a customer I want to be able to explore the menu and search for items and restaurants so that I will be able to choose what and where to eat.	3. Food Product and Inventory Module	10. User Interface(Customer)	Feb 25 - Product Backlog to Sprint Backlog	Done	
		Feat3-FR2	The system shall allow users to view restaurant pages for active restaurants.							
		Feat3-FR3	The system shall allow users to search and filter restaurant listfings by name or keyword.							
		Feat3-FR4	The system shall allow users to search and filter food items within a restaurant listing by name or keyword.							
		Feat3-FR5	The system shall display restaurant listings to the user in a paginated format.	Feat3-US2	As a customer, I want my most common restaurants and food choices to be readily available so I can access these quickly		15. Restaurant Database	Closed	Not completed because it is not a main requirement for our app	
		Feat3-FR6	The system shall use the user location to prioritize restaurant listings that are near to the user.							
		Feat3-FR7	The system shall prioritize restaurant listings if the user has previously ordered from that restaurant.							
		Feat3-FR8	The system will only show active restaurant listings.							
Feat 4	Core Feature 4: The system will allow users to create and manage food orders. It will ensure that orders are consistent, correctly stored, and follow business logic for the domain (for example, an order cannot be modified after it is completed).	Feat4-FR1	The system shall allow customers to add and remove food items to a shopping cart.	Feat4-US1	As a customer I want to add food items to my cart so that I can make an order.	5. Shopping Cart Module	10. User Interface(Customer)	Mar 4 - Product Backlog to In Progress	Done	
					As a customer I want to be able to update or delete items in my cart			Mar 4 - Product Backlog to In Progress	Done	
		Feat4-FR9	The system shall get all items in a cart	Feat4-US7	As a customer, I want everything in my cart to be accounted for so that my order is correct and I get everything I ask for.			Mar 4 - Product Backlog to In Progress	Done	
		Feat4-FR7	The system shall create a cart id upon addition of the first item	Feat4-US8	As a customer I want to have access to a cart and I want this cart to clear out so that I can have access to the right cart items.			Mar 18 - Product Backlog to In Progress	Done	
		Feat4-FR2	The system shall allow customers to modify or cancel an order before it is approved by the restaurant.	Feat4-US2	As a customer, I want to be able to modify or cancel orders before they have been approved by the restaurant so that I can add items or correct mistakes.	6. Order Management Module		Mar 11 - Product Backlog to In Progress	Done	
		Feat4-FR3	The system shall prevent the modification of orders after an order has been approved by the restaurant.	Feat4-US3	As a customer I want to be able to bookmark common orders, so that I can easily navigate and order these			Closed	Not completed because it is not a main requirement for our app	
		Feat4-FR4	The system shall allow customers to save/bookmark previous orders.	Feat4-US4	As a restaurant manager, I want to review incoming orders before I approve them to make sure I can fulfill them.		11. User Interface(Staff)	Mar 11 - Product Backlog to In Progress	Done	
		Feat4-FR5	The system shall store the order status (Pending, Approved, Canceled, In Preparation, Out for Delivery, Completed)	Feat4-US5	As a restaurant manager, I want to cancel orders that I cannot fulfill.			Mar 18 - Product Backlog to In Progress	Done	
		Feat4-FR6	The system shall allow restaurant managers to view, approve, and cancel orders.							
		Feat 5	Core Feature 5: The system will manage delivery-related information. It will support assigning deliveries and tracking basic delivery status as part of the backend logic.	Feat5-FR1	The system shall store and manage delivery information for orders.	Feat5-US1	As a customer, I want to be able to edit my delivery information to be able to receive my order even if I am in a different location.	2. User Account Management Module	10. User Interface(Customer)	Mar 4 - Product Backlog to Spring Backlog
Feat5-FR2	The system shall track and display delivery status updates for orders.			Feat5-US2	As a user, I want the system to save my addresses so that I dont have to enter them every time I order.	13. Order Database	Sprint Backlog to In Progress		Done	
Feat5-FR3	The system shall store delivery status history and display it in			Feat5-US3	As a restaurant manager, I want to assign deliveries to couriers so they can make the deliveries.	8. Delivery Management Module	11. User Interface(Staff)	Mar - In progress	Done	
Feat5-FR4	The system shall allow orders to be assigned to couriers.			Feat5-US4	As a restaurant manager, I want to remove an order from a couriers account so I can assign it to a different courier.			Mar - In progress	Done	
Feat5-FR5	The system shall prevent orders from being assigned to couriers who are not authenticated.			Feat5-US5	As a courier, I want to see the order number and address of an order assigned to me so that I can deliver it.	9. Notification Module		Mar 11 - Product Backlog to Spring Backlog	Done	
Feat5-FR6	The system shall allow orders to be removed from couriers.			Feat5-US6	As a courier, I want to be able to let the customer know that I have successfully delivered their order.		11. User Interface(Staff)	Mar 11 - Product Backlog to Spring Backlog	Done	
Feat5-FR7	The system shall allow couriers to view orders assigned to them.			Feat5-US7						
Feat5-FR8	The system shall allow couriers to see delivery information for orders assigned to them.			Feat5-US8						
Feat5-FR9	The system shall allow couriers to update the delivery status of a delivery.			Feat5-US9						
Feat 6	Core Feature 6: The system will calculate the total cost of an order, including item prices, delivery fees, and taxes. These calculations will follow predefined business rules implemented in the backend.	Feat6-FR1	The system shall calculate the cost of items, fees, and taxes for an order.	Feat6-US1	As a customer, I want to be able to see the total cost of my order, including any delivery fees and taxes, so that I will know exactly how much my order will be.	6. Order Management Module	10. User Interface(Customer)	Product Backlog to In Progress	Done	
		Feat6-FR2	The system shall calculate taxes based on predefined rules (laws governing location of order).	Feat6-US2	As a restaurant owner or restaurant manager, I want taxes and fees to be added to the cost of orders so pricing is accurate and compliant with local laws		13. Order Database	Closed	Not completed because it is not a main requirement for our app	
		Feat6-FR3	The system shall display the final cost of an order to a customer before payment.				10. User Interface(Customer)			
Feat 7	Core Feature 7: The system will simulate payment processing. No real payment gateway will be used, but the system will follow the correct workflow for accepting or rejecting a payment and updating the order status.	Feat7-FR1	The system shall send the payment amount to the payment gateway.	Feat7-US1	As a customer, I want the system to properly process my payment so I can see whether it accepts or rejects it.	7. Payment Module	13. Order Database	March - Product Backlog to In Progress	Done	
		Feat7-FR2	The system shall receive the outcome of the payment							
		Feat7-FR3	The system shall notify the customer of the payment outcome				12. User Interface(Customer)			
		Feat7-FR4	The system shall update the status of the order after receiving payment outcome.							
Feat 8	Core Feature 8: The system will generate notifications or events when important actions occur, such as order creation or status changes.	Feat8-FR1	The system shall notify restaurant owners when an order is placed for their restaurant.	Feat8-US1	As a customer I want to know when my order has been approved, left the restaurant and arrived at my location.	9. Notification Module	10. User Interface(Customer)	Product Backlog to In Progress	Done	
		Feat8-FR2	The system shall notify customers when a restaurant owner approves or cancels their order.				16. Delivery Database			
		Feat8-FR3	The system shall notify the customer when the delivery leaves the restaurant.	Feat8-US2	As a restaurant owner, I want to be notified when I receive an order request so that I can prepare the food.		11. User Interface(Staff)	Mar 18 - Product Backlog to In Progress	Done	
		Feat8-FR4	The system shall notify the customer when the delivery is at the destination.							
		Feat8-FR5	The system shall update the status of an order when the delivery is complete.	Feat8-US3	As a courier, I want to be notified when I am assigned a delivery so I can make the delivery.		11. User Interface(Staff)	Mar 18 - Product Backlog to In Progress	Done	
		Feat8-FR6	The system shall notify the courier when they are assigned a delivery.
